AMENDMENTS TO THE CLAIMS

Filing Date: June 23, 2003

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

1-60. **(Canceled)**

- 61. (Currently Amended) A composition comprising an amount of an isolated monoclonal antibody effective to prevent staphylococcal infection in neonates and a pharmaceutically acceptable carrier, wherein the antibody specifically binds to poly-glycerol phosphate of Lipoteichoic acid (LTA) of <u>Staphylococcus</u> Gram positive bacteria and is of the IgG isotype, wherein the antibody binds to and enhances opsonization of multiple serotypes of *Staphylococcus epidermidis*, coagulase negative staphylococci, *Staphylococcus aureus* and *Streptococcus mutans* by phagocytic cells with or without complement as compared to an appropriate control in an in vitro opsonization assay.
- 62. (**Previously Presented**) The composition of claim 61, wherein the opsonization assay is performed in the presence of complement, phagocytic cells, or both.
- 63. (**Previously Presented**) The composition of claim 62, wherein the complement or cells or both are human in origin.

64. (Canceled)

- 65. (**Previously Presented**) The composition of claim 62, wherein the phagocytic cells comprise macrophages, monocytes, neutrophils, or combinations thereof.
- 66. **(Previously Presented)** The composition of claim 62, wherein opsonization is measured by determining opsonophagocytic bactericidal activity.

67-76. (Canceled)

77. (Currently Amended) A composition comprising a monoclonal antibody which specifically binds to poly-glycerol phosphate of LTA of <u>Staphylococcus</u> Gram positive bacteria, or antigen binding fragment thereof, and a pharmaceutically acceptable carrier, wherein the monoclonal antibody comprises the complementarity determining regions (CDRs) of the heavy and light chain variable regions of monoclonal antibody 96-110 set forth as SEQ ID NO:87 and SEQ ID NO:89.

Filing Date: June 23, 2003

78. (Canceled)

- 79. (**Previously Presented**) The composition of claim 61 or 77, wherein the antibody comprises a portion of a human antibody sequence.
- 80. (**Previously Presented**) The composition of claim 79, wherein the portion of human antibody sequence comprises an Fc region.
- 81. (**Curently Amended**) The composition of claim 61 or 77, wherein the antibody specifically binds LTA exposed on the surface of the cell wall of <u>Staphylococcus</u> Gram positive bacteria.

82-85. (Canceled)

86. (**Previously Presented**) The composition of claim 61 or 77, wherein the antibody binds to serotype 5, serotype 8, or both serotype 5 and serotype 8 of *Staphylococcus aureus*.

87. (Canceled)

88-90. (Canceled)

91. **(Previously Presented)** The composition of claim 61 or 77, wherein the antibody reduces LTA-mediated inflammation, LTA-mediated cytokine production, or combination thereof.

92. (Canceled)

93. (**Previously Presented**) The composition of claim 77, wherein the antibody is an Fab, Fab', F(ab')2, or sFv fragment of an antibody.

Filing Date: June 23, 2003

- 94. **(Previously Presented)** The composition of claim 61 or 77, further comprising at least one additional monoclonal antibody having specificity for LTA.
- 95. (**Previously Presented**) A pharmaceutical composition comprising an effective amount of an antibody of claim 77, for use in a human neonate.
- 96. **(Withdrawn Currently Amended)** A polynucleotide encoding an antibody, or fragment thereof, of claim 61[[,]] or 77, or 88.
- 97. **(Withdrawn)** The polynucleotide of claim 96, wherein the polynucleotide encoding the variable region of the antibody, or fragment thereof, has at least 70% identity to the polynucleotide set forth in FIG. 12.
 - 98. (Withdrawn) A vector comprising the polynucleotide of claim 96.
- 99. (Withdrawn) A cell comprising the polynucleotide of claim 96 or the vector of claim 98.
- 100. **(Withdrawn)** An antibody, or fragment thereof, produced by a cell comprising a polynucleotide or vector comprising a polypeptide encoding an antibody of claim 61 or 77.

101. (**Previously Presented**) The composition of claim 61, wherein the antibody is of the IgG1 isotype.

Filing Date: June 23, 2003

102-103. (Canceled)

- 104. (**Currently Amended**) A composition comprising a monoclonal antibody which specifically binds to poly-glycerol phosphate of LTA of <u>Staphylococcus</u> Gram positive bacteria, or antigen binding fragment thereof, and a pharmaceutically acceptable carrier, wherein the monoclonal antibody comprises the heavy chain variable region set forth as SEQ ID NO:87.
- 105. (**Currently Amended**) A composition comprising a monoclonal antibody which specifically binds to poly-glycerol phosphate of LTA of <u>Staphylococcus</u> Gram positive bacteria, or antigen binding fragment thereof, and a pharmaceutically acceptable carrier, wherein the monoclonal antibody comprises the light chain variable region set forth as SEQ ID NO:89.
- 106. (**Previously Presented**) A composition comprising a monoclonal antibody of claim 61, wherein the monoclonal antibody comprises a heavy chain comprising the heavy chain complementarity determining regions (CDRs) of the monoclonal antibody 96-110 and a variable region having 80% amino acid identity with SEQ ID NO:87.
- 107. (**Previously Presented**) The composition of claim 106, wherein the variable region has 85% amino acid identity with SEQ ID NO:87.
- 108. **(Previously Presented)** The composition of claim 106, wherein the variable region has 90% amino acid identity with SEQ ID NO:87.
- 109. **(Previously Presented)** The composition of claim 106, wherein the variable region has 95% amino acid identity with SEQ ID NO:87.
- 110. (**Previously Presented**) A composition comprising a monoclonal antibody of claim 61, wherein the monoclonal antibody comprises a light chain comprising the light chain

Filing Date: June 23, 2003

complementarity determining regions (CDRs) of the monoclonal antibody 96-110 and a variable region having 80% amino acid identity with SEQ ID NO:89.

- 111. (**Previously Presented**) The composition of claim 110, wherein the variable region has 85% amino acid identity with SEQ ID NO:89.
- 112. (**Previously Presented**) The composition of claim 110, wherein the variable region has 90% amino acid identity with SEQ ID NO:89.
- 113. (**Previously Presented**) The composition of claim 110, wherein the variable region has 95% amino acid identity with SEQ ID NO:89.
- 114. (**Previously Presented**) A composition comprising a monoclonal antibody of claim 61, wherein the monoclonal antibody comprises a heavy chain comprising the complementarity determining regions (CDRs) of the monoclonal antibody 96-110 heavy chain variable region set forth as SEQ ID NO:87 and having at least 70% amino acid identity with the monoclonal antibody 96-110 heavy chain variable region set forth as SEQ ID NO:87.
- 115. (**Previously Presented**) A composition comprising a monoclonal antibody of claim 61, wherein the monoclonal antibody comprises a light chain comprising the complementarity determining regions (CDRs) of the monoclonal antibody 96-110 light chain variable region set forth as SEQ ID NO:89 and having at least 70% amino acid identity with the monoclonal antibody 96-110 light chain variable region set forth as SEQ ID NO:89.
